

Web Fundamentals - Assignment #1

Create a webpage that allows the user to enter as many numbers as desired and separate them into even and odd numbers.

Then find and display the sum and average of all the even numbers and the sum and average of all the odd numbers. Make sure they are nicely formatted.

Validations:

1. Do not allow 0's
2. Make sure numeric data

Hand In:

1. CPA standard cover page
2. Code
3. Print screen of results
4. Demo to instructor

Enhancements:

1. Only allow numeric numbers in the keys entered

Due Date: check with syllabus
